## REQUEST FOR ASSISTANCE

5 This Application for an U.S. Letters Patent has been prepared solely by me, as the inventor and applicant, and is believed correct and in proper form to the best of my knowledge. This application is a pro se action and as such the examiner is requested to provide me with any reasonable additional assistance in preparing or amending my claims and with general processing of this application as may be provided for under the general rules or policies of the United States Patent and Trademark Office, or under the procedural guidelines of the MPEP 707.07(j).

### ***707.07(j) State When Claims Are Allowable***

#### **INVENTOR FILED APPLICATIONS**

When, during the examination of a pro se case, it becomes apparent to the examiner that there is patentable subject matter disclosed in the application, the examiner shall draft one or more claims for the applicant and indicate in his or her action that such claims would be allowed if incorporated in the application by amendment.

This practice will expedite prosecution and offer a service to individual inventors not represented by a registered patent attorney or agent. Although this practice may be desirable and is permissible in any case where deemed appropriate by the examiner, it will be expected to be applied in all cases where it is apparent that the applicant is unfamiliar with the proper preparation and prosecution of patent applications.
